Using file, you can circumvent those limits without paying to upgrade your team chat service. You decide who you want to share your files with. The cost of that data transfer is covered by your internet service or the data plan on your phone. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device. We have no file size limit. There are no restrictions on the number of times a file can be downloaded. Keep your files private, or send your download links only to friends or family. You can give this download link to your friends by mail or instant messenger. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Just upload the file you want to share with your friends and we send you a download link to your file. It is also allowed to link to the download page from websites and communities. So try our free and simple filehosting service now. Files can be downloaded from any computer from our high speed servers. If only we could, we surely would! On the other hand, using file can actually save you money. filehosting provides an easy possibility for you to send large files to your friends. No account or credit card is required to get started. You don't need any special software installed to be able to download your files. File is free to use with no gotchas and no hidden fees. This is easy, fast and reliable filehosting!
