Unfortunately, we can't make thatpart free. You decide who you want to share your files with. Files transferred the old-fashioned way tend to pile up and be forgotten about, eventually costingyou money in data storage fees. There are no restrictions on the number of times a file can be downloaded. The cost of that data transfer is covered by yourinternet service or the data plan on your phone. When you use file, you avoid storing the file you're sending in your cloud storage or mail server. Your walletwill be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers,then from our servers to your friends device. It is also allowed to link to the download page from websites and communities. Why pay storage fees for a file thatyou just wanted to send to a friend or colleague? Also, many team chat apps have limits to the size of files that can be transferred within their apps. If only wecould, we surely would! On the other hand, using file can actually save you money.
