The home was a rocky ship, far from the coast and its false stability advertising. As winds winds and ten feet waves pummeled its small and open ship on all sides and almost capsize, captain Salvador Alvarenga and its four years in Costa Azul, he was rarely involved in ugly fights or incidents. Unlike some nations where the fins are sold, in music the Shark fillet is a traditional offer in the restaurants. So the fishermen continue. He continued to be amazed throughout history. Do not think about death. Alvarenga was known as Chacha, an affectionate version of Piggy, thanks to her voracious appetite. But Alvarenga luchó. The story of this man is unfathomable and inspiring. If a depressed person avoids committing suicide then the book is an © xito. Visitors from this hard boys neighborhood immediately face stars and some basic questions. If I can do it so you can. Costa Azul is a lost corner of Chiapas, the most poor state of music and a region where emigrants tend not to stop while they continue on the long northern walk to the United States. But I got used to it, and I grow up to enjoy it sometimes. This is part of why you are so ripping. Two bare bulbs drained in the night breeze. He had an experience of one day as a fisherman and hoped to find a boss or patron willing to give him an opportunity to fulfill the dream of life of being his own captain of him in a small fishing boat. Scattered on his ship's roof were the ingredients of his life: the flowers assorted of knives, cubes and blood stakes. It conforms to his style. The book has a map in the Finals that plot the course that Alvarenga took. But the thirtyear-old Alvarenga did not look at the land; his eyes were focused on the Pacific Ocean and had been since he was eleven years old old man and had fled from school to live on the beach with friends. Using fish vertebrae as needles, he sewed his own clothes. It would launch to the sea for ocean trips of several days to the richest remaining fields along the looted coastal ecosystems of Mexico. When you love the ocean, you love adrenaline, energy. Salvador Alvarenga had walked on rocks for six full days along the beach town of Costa Azul. He went out to the race and found his shelter on board the boats. The sharks had their own jargon, private jokes and deep scars or missing fingers that related the daily brutalities of fishing in the deep sea of small boats. If you don't have a job other than fishing in the ocean, what choice do you have? As fishermen in the villages around the world, the local crews launched from Costa Azul face a grim future: renunciation of fishing or every few years conform to the realities of overfishing and travel further to the sea. When other fishermen were dumped, sunk or lost, Alvarenga was one of the first to volunteer to look for missing colleagues, regularly risking their lives to do so. Between the hierarchy of the fishermen, the sharks were elite and seen as a bit crazy. He learned to catch fish with his bare hands. While waiting for grilled chicken and colder crowns, Alvarenga opened a glass fiber chiller containing bait for the next day's fishing trip. A long line with seven hundred hooks. The fishermen planned to put 2,800 hooks, so they had stored the coolers with hundreds of pounds of sardines to use as bait. I could fight the madness that was bubbling to the surface. There was an ugly chain-fight and you could say that this guy knew how to roll. Manysuffer only for what happens in his head; He was also being physically tortured. "You're going to get food poisoning," Willy said. The author asks him to write this book. In the sea in front of the coast of Mã xico, he had seen the wild destiny of the fishermen receive minimum wages. A local fisherman suggests why the scene is so nervous: "Do you want to see what really happens in the Chiapas region? He had heard night stories of being trapped by winds that the place just called a north." It is cooked by the juices in my stomach, "Alvarenga laughed while preparing a second sardine. Of the book. This is the part of the city where a lvarenge arrived. But the jobs are scarce in Chiapas. Your mind has to be relaxed while you think about survival. In the sea it felt IBRE. Man against the elements. Only a few hundred people lived in the community next to the beach, although it was densely populated by flocks of migratory birds, many of them on the annual trip of 2,000 miles south from California. While the minor men fished the lagoon for the Pargo and the Platija and the shrimp saved twelve miles to work on farms, the types of deep water, this crowd, they would become the sea, much more than the point I had the opportunity to read his story and learn more about the man we hear in the news. On November 17, 2012, Salvador Alvarenga left the coast of music for a two day fishing trip. Alvarenga appeared too clean and organized to be a tramp, but he shared few personal details about his past. He wouldn't have food. I was inspired by doing great things. Decided with low technology and dangerous, the fishing operations of Costa Azul allowed a man to play with his life and his luck. Mino, his supervisor, describes Alvarenga as a man who practically ate anything that landed near the grill. â € œIf you are a real fisherman, you fall in love with the Ocã qonâ €, said Alvarenga as a man who practically ate anything that landed near the grill. â € œIf you are a real fisherman, you fall in love with the Ocã qonâ €, said Alvarenga as a man who practically ate anything that landed near the grill. â € œIf you are a real fisherman, you fall in love with the Ocã qonâ €, said Alvarenga as a man who practically ate anything that landed near the grill. â € œIf you are a real fisherman, you fall in love with the Ocã qonâ €, said Alvarenga as a man who practically ate anything that landed near the grill. â € œIf you are a real fisherman, you fall in love with the Ocã qonâ €, said Alvarenga as a man who practically ate anything that landed near the grill. â € œIf you are a real fisherman, you fall in love with the Ocã qonâ €, said Alvarenga as a man who practically ate anything that landed near the grill are anything the grill are anything the grill are anything the grill are any life, including his girlfriend, his parents and fits, his daughter of a year. Each man was free to calculate (or badly) the cost/benefits for himself, to remain land or go to the sea. It is love because the océ anus gives you food, she provides money and is a little. Like migratory birds, Alvarenga was attracted to the protected lagoon and his countless fish supply to catch. Even if he had nothing when he came to the shore, he would be screaming as he hit his ship, he would absolutely, absolutely the nail. Oblivia or immune to the parrots of the world, Alvarenga vivió in peace, the type of type that could snore in a public autobãos, allow his head to collapse on a random shoulder in the movies or soy in a park. The banther of men was without stopping the slang, profanities and jokes inside. Maybe if people read this, they will realize that if I can do it, they can do it. day. Him running in Guatemala, where he lived under a false name, and then migrated to Mexico. He was confident he could outmaneuver the waves and routinely arrived home with his icebox packed to the brim, a thousand pounds of fresh fish testament to his skill and courage. He considered suicide on multiple occasions & AAAincluding offering himself up to a pack of sharks. That is the nice side of the tracks. Alvarenga chose the latter. The high-value fish¢ÃÂÂwhat¢ÃÂÂs left of them¢ÃÂÂare driven farther out to sea. From the moment he entered Costa Azul in the fall of 2008, he felt a deep sense of relief. A band of outcasts and society¢ÃÂÂs castaways, they are bound together in tribal unity and by the codes and deadly instincts of professional hunters. These storms begin in the Gulf of Mexico then swirl southwest, where the winds are channeled through a narrow gap in the Sierra Madre mountains. The boat's journey across the Pacific. There¢ÃÂÂs a particular few days where Alvarenga makes a friend in a very large whale shark, who drifts along with him. Three weeks later when he returned to his home in the small village of Garita Palmera, he received a new shock. Taking apart the outboard motor, he fashioned a huge fishhook. Alvarenga had a terrible singing voice made worse by an overdose of confidence. He imagined a method of survival that kept his body and mind intact long enough for the Pacific Ocean to toss him up on a remote palm-studded island, where he was saved by a local couple living alone in their own Pacific Island paradise. This was likely the last shift for days¢ÃÂAHe would say, ¢ÃÂABoss, Boss, this one lacks twenty hooks.¢Ã And if the nets weren¢ÃÂÂt stored just right he would unroll them and he would fold it perfectly; he would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there and you catch less.¢Ã He would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there and you catch less.¢ÃA He would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there and you catch less.¢ÃA He would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there and you catch less.¢ÃA He would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there and you catch less.¢ÃA He would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there and you catch less.¢ÃA He would say, ¢ÃÂÂThis is what brings in the money, a missing hook here and there are the money in the money is the money of the money is the money in the money in the money is the money in the money in the money is the money in the money is the money in the money in the money in the money is the money in th These northern winds were so common that local newsmen did not even bother to give them an appropriate name like Katrina or Sandy, but they simply refer to them as Flood Front #26 and warned fishers to stay in the port. Palm white sand beaches attract these tourists with the promise of privacy, virgin landscapes, hummingbirds, pink spoonfuls, osprey and dozens of species more than flitter and fly with abandonment. At a market price of 20 Mexican pesos a kilo, approximately 70 cents per pound and subtracting the 50 percent quota for the boss and the huge gas costs, men had, on average, \$150 in pocket. The bottleneck bends or triplicates the speed of the wind, which means that a fresh 20 mph wind in the Caribbean Sea comes out as a 60 mph explosion that scientists describe as "a wind jet." This noisy wind tunnel is overflowing in the Gulf of Tehuantepec, an area located just off the coast of Côte d'Azur. 100 miles from coast — where only the bravest fishermen dared to travel — everything was biting. "During the winter months. Most of the homes among hotels have been bought by local and political entrepreneurs who imagine a gold mine from tourism as soon as Mexico spills its reputation as a blood-stained narco-state where the bars occasionally get drunk and beheaded waitres. I already knew the result, and I knew it would be okay, but I was still very mopey while reading about your emotional and mental tax experiences. You share combat and fights. The ocean is out there more than 120 kilometers [70 miles]. A partner. Despite conservation attempts and evidence of a collapse of the Gulf of Tehuantepec. Upon opening to the place, Alvarenga's enthusiasm, his generosity in giving a hand to help The fishermen and their diligent sweep of the tourist part of the city impressed them quietly. A war of revenge began and Alvarenga was apparently the next on the list. A vicious storm killed his engine and the current dragged his boat into the sea. This wind tunnel is so notorious and well marked on the nautical maps that the sailboats usually trace a detour hundreds of miles to the sea to avoid the feared Gulf winds. He was wearing only a small backpack and his clothes were used. Poverty makes you do strange things. What do you want? The whole police force for the state of Oaxaca [north of Chiapas] has been paid." Alvarenga was neither a narco nor was he willing to run even the occasional coke bald on the coast, despite the promise of wealth. Neither would the wheels serve them much. His actions spoke of volumes while he was quietly finding a broom and began sweeping the streets, collecting trash from the docks and making a home under a tree. The author of this book, Franklin, is a news reporter for multiple publications, and could say of his writing style. "We had just roasted a tuna fish and already had a mahimahi cut open and ready to cook. His long-time fishing partner Ray explains, "I never saw him go into a fight except when some guys were breaking the furniture in Doña Mina's [a local restaurant]. --Ce texte fait r\(\tilde{\mathbb{G}}\) \(\tilde{\mathbb{G}}\) \(\tilde{\mathbb{C}}\) edition kindle edition. Over time, several fishing patterns competed to attract Alvarenga away from their current boss. Crown beer cans, tequila bottles, a cheap grain alcohol, lit the patio. Being eaten alive by sharks was probably the least violent way they could have died. And he died younger. To Alvarenga was the ideal lifestyle. A "drawn saga", (Daily Mail), 438 Days isFirst story of one of the most amazing survival stories in modern times. Sharks are their favorite capture. hospital room covered with bandages. Few are those that have almost miraculous survival, fed by human value, faith, strength and intelligence. He vigorously defended the lie if someone questioned his story. It will be eeeeeeeee are before the food arrives, he said impatiently while taking a sardine while his hand. No patient ordered a man to the sea if a sudden northern storm was forecast, and unlike large and commercial ports along the Mexican coast, in Costa Azul there was no port of port teacher with the ability to avoid that the ships went to the sea during the time of Raucous. Once he was stranded, he began a radical internal change. But Alvarenga has never been able to invent an alternative reality. â even if he did not capture more than one or two fish, that for many boys he would have made them sad, he always got happy, says Bellarmino Rodraguez Beyz, who was the direct supervisor of him on the ground, a former colleague and a friend near. Every time I think of this man, the words "Amazing" and "Milagro" come to mind. There was little risk of drunk driving, and many of them possess a car. Alvarenga was free to work as hard, so long and as sporadically as allowed by his party's lifestyle. I said: "Chancha, you must have little ones." Another colleague suggests that Alvarenga's nickname was a skin color reference. He is your enemy. Why? The people of the beach here live, they go to sleep in a bed, but there are out, you feel terror. 438 Days took time to grab me. A small fishing boat. Hangovers were inconsequential at this stage in Alvarenga¢ÃÂAs life¢ÃÂÂhe either drank them off or went on a two-day fast where his body simply purged the alcohol out of his pores. Even large ships are unable to resist the storm force winds and fast building and breaking seas. On the left side of town sits a row of low-budget fishing shacks and an oceanfront dock packed with a dozen canoe-shaped boats twenty-five feet long and capable of hitting 50 mph, especially when powered by a pair of 75-horsepower Yamaha outboard motors. Reggaeton music bleated from a stray cell phone and the men lamented the perpetual shortage of single women. He preferred to live on the water. First of all, happy twoà Âyear rescue anniversary to Salvador Alvarenga! It was exactly twoà Âyear sago today that Alvarenga washed up onto a little island and was taken in by a generous local couple who helped nurse him back to health. Friends begged him to flee, called him stupid for staying a day more. He tried to haul it home but it sank. Vessels have no option but to turn downwind and brace themselves for a long and frightening ride south and out to sea for 200 to 300 miles, at which point the effects of the Tehuantepec winds begin to fade.¢Ã If ever there was a place not to head to sea in a small, easy-to-roll boat, this was it. Optimism was his trademark. Nighthawks and owls hunted for prey as fruit bats looped through the palms. You have to survive and think about the future of your life, that life is beautiful! How can you imagine taking your own life? He didn¢ÃÂÂt even see it as a risk. Photo: 438 days Nov 21Two fishermen. They called themselves Los Tiburoneros¢Ã t didn¢ÃÂÂt matter that they often caught more tuna or that shark; they still cultivated the association with the most notorious predator of the ocean. I felt like I was there. Or was it six against two? Based on dozens of hours of exclusive interviews with Álvarenga, his colleagues, search and rescue officials, the remote islanders who found him and the medical team that saved his life, 438 days is not only "an intense and immensely absorbing reading" (Book List) But an unforgettable study of the resistance, the ingenuity and determination required for a man to survive more than one year lost and drifting in the sea. He looked and acted like a good person. Fat joints, like accessories from a Jimmy Cliff reggae movie, rolled the room. In short, I'm usually not a fan of non-fiction and memories, 438 days was called Saviour and came with bloody feet, he said that he was looking for work, anything to begin, but for those who saw the newcomer, he seemed a man to the race. If you begin to think otherwise, you go to failure. I could eat and never fatten. Be strong. Think positive. From afar, it was shining like a shelter. He was a party boy. The iguanas slammed loudly as they walked through the roof. By increasing through the ranks during his four years in Costa Azul, Alvarenga revolved some feathers while rebounding from head to head, seeking his ideal balance of independence, cash and decent treatment. Instead of a three-day folder, the men were at the speed of the average speed. Alvarez and friends washed in hammocks inside their cabin by the beach. He never lost consciousness and consoled his mother, told her to hold on, that he was not leaving yet. I loved to see how this event hit him for the better. Go out to the island at two a.m. and look at all the narco bars running northwards; they move two million dollars for In Cocaana in this coast. Alvarenga never felt stable on earth, as if the solid earth was an illusion for a rotating planet. But I needed to slow down. To fill the refrigerator, these fishers now travel 50 miles, 75 miles and even 100 miles from the coast of Chiapas. Even in your chest you feel it. The overfish has decimated the fish population along the entire stretches of the Mexican and Central American coast. In a local economy where a meal for two costs \$4 and a hotel room next to the beach ran \$7 per night, each man packed a substantial bank. He loved his drugs and his alcohol. When the chicken arrived, the men ate with taste, cut beers and threw the cans in the lagoon. If you think you're gonna die, you'll die. I really liked to read it, though, and I felt feelings of hope while reading. He claimed to have left Mexico, a journey of about seven thousand kilometers. Alvarenga's story was so interesting to me, though, so I took a bet and accepted this book for review. Only after a dangerous five-hour journey crashing through the waves can cut the engine, drop your 2-mile long line with up to seven hundred hooks and expect the tuna, mahimahi, marlin and sharks to bite.
